City Council to Consider Joining Telecommunications Legal Advice Consortium

On October 18, the City Council will hear a presentation from staff about joining a telecommunications legal advice consortium of 16 cities. The consortium was formed to address recent requests to locate cell telephone facilities in the right-of-way. Staff is recommending Snohomish join the consortium.

Mobilitie is a company that provides infrastructure that increases the data capacity of existing facilities operated by cell telephone carriers. They have contacted several cities, including Snohomish, about locating poles in the right-of-way that would be 80-120 feet high.

By joining the consortium the City would increase its bargaining power in negotiating with Mobilitie. Also, the cost of drafting documents and developing a model code would be shared with the member cities.

For more information contact Planning Director Glen Pickus at 360-282-3173. The staff report for the City Council agenda will be published and available by the end of the day on Friday, October 14.

Planning Commission Public Hearing on LID Scheduled for October 5

At its next meeting, the Planning Commission will hold a public hearing to discuss proposed changes to development regulations that will require use of Low Impact Development (LID) techniques, where feasible, for managing stormwater in new development.

The public hearing will be held at 6:00 p.m. on Wednesday, October 5 at the Snohomish School District Resource Center, 1601 Avenue D. The public is encouraged to attend and participate.

The proposed changes are required by the City's NPDES (National Pollution Discharge Elimination System) Phase II stormwater permit. The permit is issued by the Washington State Department of Ecology (DOE). Included in the proposal is adoption of DOE's 2012 Stormwater Manual for Western Washington.
