CONGRATULATIONS!

Ryan DeLeuw has passed the Water Distribution Manager 1 Water Exam from the Washington State Department of Health (DOH). Applicants must meet specific experience, education, and examination requirements in order to

qualify for certification. The general knowledge test consisted of questions in the following content areas: administrative duties, DOH regulations, equipment maintenance, disinfection, math, system design, security and safety procedures. A competent certified operator must be able to perform duties without endangering public health. Operators must also have the necessary skills, ability, and judgment to properly operate and maintain the facilities and infrastructure. A few of Ryan's daily duties include water main and service installation and repairs, hydrant flushing, and taking water sample chlorine residuals. Having qualified and well trained water staff plays a vital role in keeping our water systems well maintained and operational and ensures we are supplying our customers with safe and reliable drinking water. Ryan joined City staff in April 2005.
