## Proposed Mobile Food Vendor Regulations

The City of Snohomish is currently considering new regulations, which would allow Mobile Food Vendors to operate within certain areas of the City.

Currently, Mobile Food Vendors are only allowed to operate in conjunction with special events, such as the Farmers Market. The new regulations would allow them to operate throughout the year within areas designated by the City. A public hearing on the matter is scheduled for the June 7 Council meeting. It is anticipated that the Council will vote on the regulations that evening.

The proposed regulations have been crafted to work with existing brick and mortar restaurants but your input is certainly important. The following describes the project goals and where Mobile Food Vendors would be allowed to operate under the proposed regulations.

#### Project Goals

- Provide a process to license mobile food vendors within certain areas of the City.
- Have standards to ensure mobile food vendors operate in harmony with brick and motor restaurants.
- Require mobile food vendors, operating within the City, to obtain and maintain proper licenses/permits from appropriate state and local agencies to ensure public health, safety, welfare standards are met.
- Provide additional economic development opportunities and amenities for those who live and visit the City of Snohomish.

**Where Mobile Food Vendors could locate (see map below)**

- Under the proposal , no mobile food vendor could operate except on:
  - Private property in the Pilchuck District’s Neighborhood Center Zone, Neighborhood Civic Zone, or Business Park land use designation
  - Public right-of-way or public property adjacent to the First Street travel lanes west of Avenue D.
- When located in one of the areas described above, no mobile food vendor could sell or deliver any food or goods if the vending unit is within 200 feet of the entrance of any non-mobile business establishment that is open for business without the written consent of the business.

Agenda documents for this hearing will be available on the City’s website (<http://snohomishwa.gov/>) beginning June 3, 2016. If you wish to receive a copy of the draft regulations sooner, please contact Clay White, Interim Planning Director at [white@snohomishWA.gov](mailto:white@snohomishWA.gov) or (360) 282-3173.

## Water Plant Receives Department of Health Optimization Award!

The City of Snohomish Water Treatment Plant staff Kendall Utt and Paul Morse were recognized for their outstanding performance and treatment optimization last week by the Washington State Department of Health.

The Department of Health’s Drinking Water Division began their Treatment Optimization Program (TOP) in 2001 in an effort to improve the performance of rapid rate filtration surface water treatment facilities. The purpose of this is voluntary program is to maximize public health protection provided by surface water filtration plants like that of Snohomish.

Participants in the program commit themselves to working toward meeting treatment optimization goals for practical removal and disinfection that are more stringent than current regulatory requirements. Because turbidity is a readily measured indicator of treatment plant performance, TOP tracks finished water turbidity data for all conventional and direct filtration plants in Washington.

To receive this award, a plant must also meet other stringent criteria related to public health protection. The City’s Water Treatment Plant is one of eleven to receive the award this year. This was the Washington State Department of Health’s eighth year for the TOP recognition program. Each year the Department of Health issues a bronze award for 3 consecutive years of optimization, a silver award for 5 consecutive years, and a gold award for 10 years to qualifying systems.

For the calendar years 2013-2015, the plant’s finished water turbidity was 0.10 Nephelometric Turbidity Units (NTU) or less for at least 95 percent of the time, which meets or exceeds TOP’s turbidity goal. Achieving consistent high drinking water quality like this is the mark of a highly dedicated and skilled water department staff. Staff accepted the Bronze Certificate of Achievement for 3 years of outstanding performance.
